

Cash Between Chinese And Japanese Troops At Mukden Suburb

Peking, China.—After a three-hour fight, North Manchurian troops captured Mukden. According to official dispatches received here by Montreal (Chung Hsing Hsin), Governor of Manchuria.

The dispatches declared that between 75 and 80 Chinese soldiers were killed in the unexpected attack. The Japanese, who had appeared north of the city, captured two Japanese before they fled. The Japanese Government was informed, according to official dispatches, that the Chinese had started and shall hold in the Mukden district, according to the Japanese commission, at the rate of about one a minute.

Chang, Hsing-Hsin telegraphed orders from Peking that all Chinese troops must depart their positions in Mukden and move to residence.

Tokyo, Japan.—Japanese and Chinese troops fought a three-hour battle, according to official dispatches, before they fled. The Japanese Government was informed, according to official dispatches, that the Chinese had started and shall hold in the Mukden district, according to the Japanese commission, at the rate of about one a minute.

Cut Land Taxes

Relief For Manitoba Agriculture. Winnipeg, Man.—Cutting about \$80,000 from the land taxes for provincial revenue an order-in-council has been passed by the government. The step is intended to give farmers a larger share in revenue derived from the land.

The levies on the municipalities of the province have been reduced. The levies on the municipalities of the province have been reduced. The levies on the municipalities of the province have been reduced.

MEASURES TAKEN FOR RELIEF WORK ARE OUTLINED

Relief for agriculture was the chief motive of the change but it is also hoped to have the effect of putting the farmer in a better position to meet the competition of the United States.

Local and District

If you know of any personal item let us have them for this column.

J. J. Bradford shipped a method of cattle from Hymus to Hymus last week.

O. B. Murdoch, customer and valuer, McIntyre, was a business visitor to Delia on Tuesday.

Born on Sept. 16, 1931, at the Drumheller Hospital, to Mr. and Mrs. W. A. Hoover, of Delia, a daughter.

Bob Selkirk, who has been visiting in Calgary for a couple of weeks, arrived here late in the morning of this week.

Calgary stock show and sale of cattle, sheep, and swine will be held from November 20 to 4th, 1931, at the Exhibition Grounds.

Mr. and Mrs. John Sakakia left Wednesday on a fortnight's vacation. While away Mrs. Sakakia intended to have her tonsils removed at Drumheller Hospital.

As will be seen by the Opponent Flour Mills ad, in another column that, owing to the poor grade of wheat, and heavy dockage, farmers are requested to fan their wheat well before bringing it to market, and only wheat of good milling standard is desired.

A neutral task seems as if it could not be very interesting, but there is something in it. In the case of the Baptist Church on Sunday last, at 12 noon, and learn something about history. If you would like to get identified, come in the evening at 7:30. Come and help us in our new series.

Representing an increase of 15,000,000 bushels over the same period last year, 1930-31, the bulk of grain was marketed on the Canadian Pacific Railway system, during the twelve-month period since August 1, 1930. This gives the railway company a percentage of 83.3 of all grain shipped in that period.

Like Lake Letellier, the poplar, one of the glories of this part of the world, is in thousands of places all over the world. The poplar is the chestnut of the north, and the chestnut of the south is the poplar. The poplar is the chestnut of the north, and the chestnut of the south is the poplar.

GUARD YOUR CHILD

It is possible to eradicate diphtheria from Canada. No looser word is this disease. No looser word is this disease. No looser word is this disease. No looser word is this disease. No looser word is this disease.

The germ which causes diphtheria is found in the throat and nose of those who are developing the disease or who actually have diphtheria. It persists for varying periods of time, during and after convalescence. Not a few apparently well persons are actually carriers, and they harbour the germ although they are well.

Such being the case, it is obvious that in our daily lives, we are all exposed to the disease. We are all exposed to the disease. We are all exposed to the disease. We are all exposed to the disease. We are all exposed to the disease.

The only practical means of controlling diphtheria is to render each individual inhospitable to the germ by the use of antitoxin. It is to be given from time to time. Fortunately it is in our power to render our child resistant to such attacks.

It is possible to secure this antitoxin by the use of the vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine.

We know, as the result of common experience, that the person who has recovered from an attack of diphtheria retains, as a result, some power, which he did not possess before, to resist subsequent attacks of the diphtheria germ. We say a person is an individual that, as a result of the attack of the disease, he has some immunity to diphtheria.

It is possible to secure this antitoxin by the use of the vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine. The vaccine is a vaccine.
